

Accelerated Delivery Program for PALS

Delivery of Individualized Power Wheelchairs in as soon as 18 days.

A power wheelchair is an important mobility aid for PALS (People with ALS). Due to the progressive nature of the ALS disease, ATG Rehab recognizes that time is essential in ensuring prompt, accurate evaluation, fit and delivery of a custom power wheelchair. ATG Rehab listened to clients and clinicians and developed an innovative Accelerated Delivery Program for PALS. As a result, ATG Rehab continues to exceed the industry standards for evaluation to delivery time.

More than simply a program, our PALS Accelerated Delivery Program is a promise... a critical commitment to quality care from our initial evaluation through the delivery of a custom power wheelchair. Every day is critical and delays are unacceptable. ATG Rehab will provide a custom power wheelchair, for a qualified PALS customer in as few as 18 days of receipt of completed paperwork. Our goal is to schedule the delivery appointment at the time of evaluation.

Our experienced, compassionate and caring professionals will help customers, caregivers and clinicians select the proper equipment to meet and exceed expectations – improving the quality of life for PALS.

In the immortal words of Lou Gehrig in his farewell speech at Yankee Stadium, "For the past two weeks you have been reading about the bad break I got. Yet today, I consider myself the luckiest man on earth... I may have had a tough break, but I have an awful lot to live for."

With ATG Rehab on your team... we help PALS live every day to the fullest.

"ATG Rehab will provide a custom power wheelchair for PALS, within 18 days of receipt of completed paperwork."
